Best product quality

Visit the product

Butcher.

Charcutier.

Head of charcuterie laboratory.

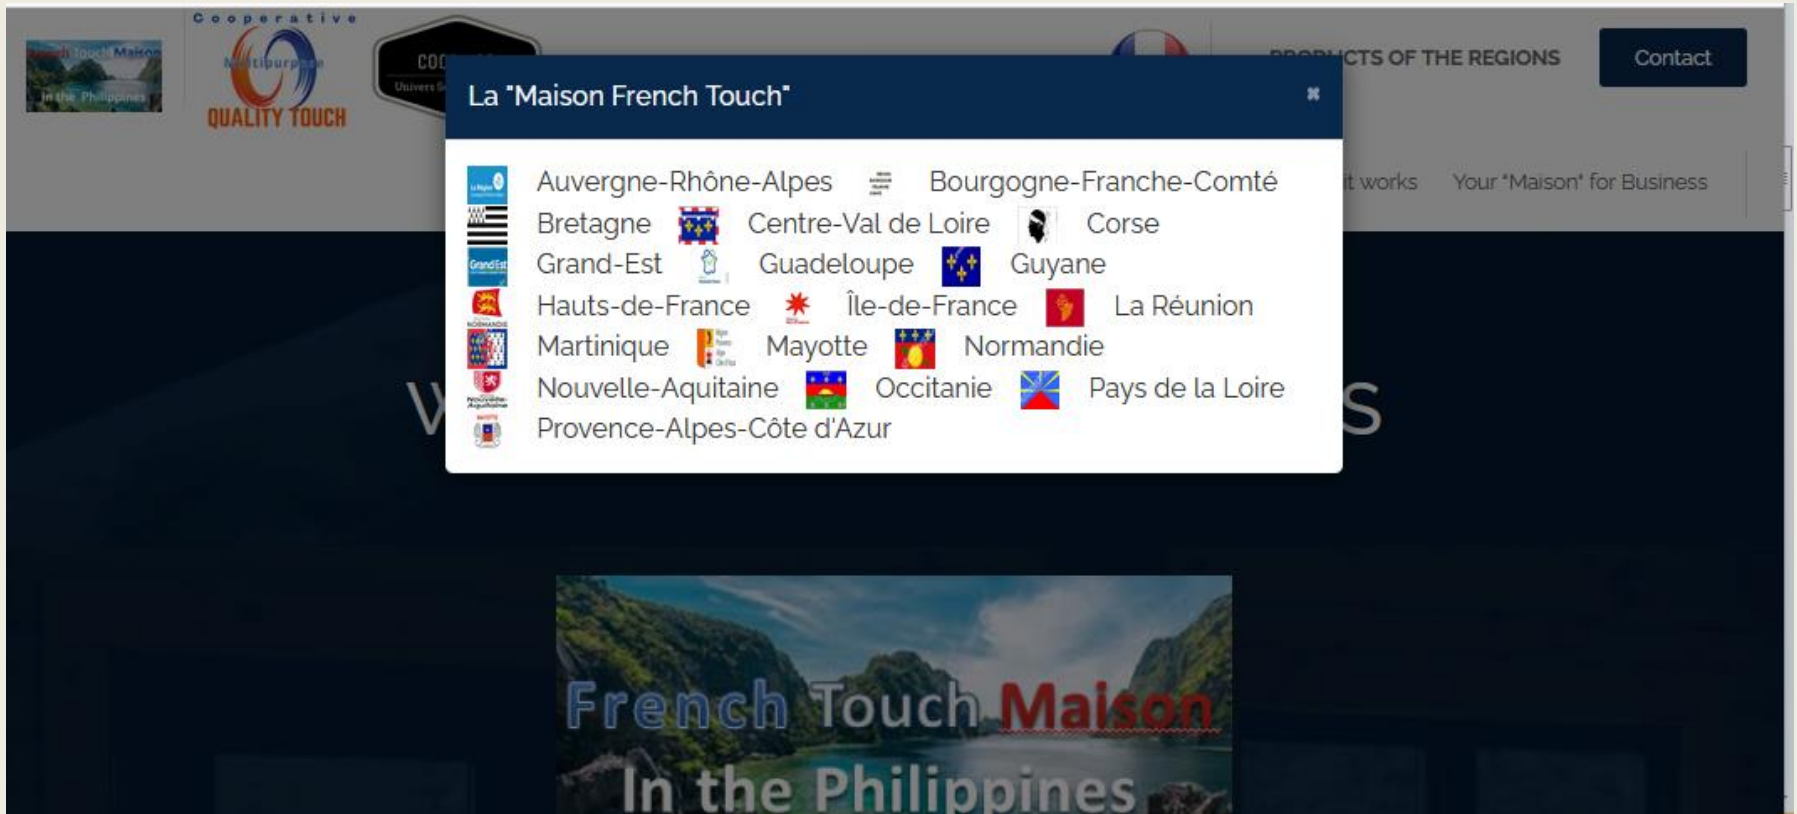

Pork is the basis of the diet in the Philippines, yet apart from rough cutting due to a total lack of training, there are few cured pork products. The "HAMy" Franchise aims to create a network of charcutiers who self-produce their own realizations but integrate Auvergne ham and sausage products for resale.

Charcuterie is a product made from pork meat or offal. The word also designates the store where this type of product is sold and all the professionals who sell it.
